ACADEMIC PROJECTS

Predicting Accuracy Rate of Cancer with Adaptive Boosting | Python (Jupyter Notebook)

Fall 2021

Machine learning model/algorithm based on Adaptive Boosting (*AdaBoostClassifier*) on a Scikit-learn dataset (breast cancer Wisconsin) that predicts the accuracy rate of cancer to identify whether its malignant or benign.

Academic Information Database | Java (Eclipse IDE)

Spring 2021

Console-based record keeping and retrieving program created using sorted array-based structure that uses operation like insert, view, modify and delete for student's academic credentials like Name, ID, Major and GPA.

Nutrition Tracking Database | SQL (MySQL Workbench)

Fall 2020

An archive of health and exercise data that records calories gained and lost to measure body mass index.

Animals Sound Board | Processing Java (p5.js)

Spring 2020

Interactive sound simulator capable of mimicking 9 different sound of animals on either click or hover.

RELATED COURSEWORK

- Object-Oriented Programming
- Algorithms & Data Structures
- Information Retrieval
- DBMS
- Interface Designing
- Applied Computational Thinking
- Project Management
- Machine Learning

AWARDS & ACHIEVEMENTS

TWU Transfer Scholarship Recipient

Spring 2020 – Spring 2022

Urban Fellows Program Scholarship Recipient

Summer 2020

TWU Deans' and Chancellor's List Candidate

Spring 2020 – Fall 2021

Texas Public Education Grant (TPEG) Recipient

Fall 2021
